SCORING (Coincheur's scale; agree on your table's rules before you play)

- **A deal is worth 162 points**: 152 in the cards + 10 for the last trick (dix de der).
- **Belote** (King + Queen of trumps in one hand): **20 points**, always kept by the team holding it.
- **Contract made**: the taker reaches the bid *and* scores more than the defence (belote included). The taker scores their points + the contract; the defence scores its points.
- **Contract failed**: the defence scores **162 + the contract**; the taker keeps only their belote.
- **Coinche ×2, surcoinche ×4**: the team that wins the deal scores **162 + the contract × 2** (or × 4); the other keeps only its belote.
- **Capot** (all 8 tricks): 252 instead of 162. **Bid capot** = a **250** contract: made, 252 + 250 = 502; failed, the defence scores 162 + 250 = 412.

CARD VALUES

	A	10	K	Q	J	9	8	7
Trump	11	10	4	3	**20**	**14**	0	0
Plain suit	11	10	4	3	2	0	0	0

Check every line (except a générale): points Us + points Them = 162 + the contract (× 2 if coinched, × 4 if surcoinched) + 20 per belote; 252 instead of 162 if a team won every trick.

Example: we bid 90 in hearts, take 104 card points (last trick included) and hold the belote. Us: 104 + 90 + 20 = **214**; Them: 162 − 104 = **58**. Check: 214 + 58 = 272 = 162 + 90 + 20.
